Portfolio

PROFESSIONAL SUMMARY

Aspiring Data Scientist with a good foundation in Python, machine learning, and data analysis. Experienced in building end-to-end ML solutions involving data preprocessing, feature engineering, model development, and evaluation. Passionate about leveraging data-driven insights to solve real-world business problems.

EDUCATION

Certification Program in Artificial Intelligence & Machine Learning 07/2025 – 06/2026
IIT, (Mandi)

Master of Earthquake Engineering 07/2018 – 07/2020
JMI University, New Delhi

Bachelor of Technology in Civil Engineering 05/2012 – 07/2016
ITM College, Aligarh

SKILLS

ML Modeling & Evaluation
Regression, classification, hyperparameter tuning, cross-validation, model evaluation (precision, recall, F1-score)

Frameworks & Libraries
scikit-learn, PyTorch / TensorFlow, NumPy, Pandas

Tools & Workflow
Git/GitHub, Jupyter Notebook

Data Preparation & Analysis
Data cleaning, feature engineering, exploratory data analysis (EDA), handling missing values

Soft skills
Stakeholder communication, problem-solving, analytical thinking

PROJECTS

Customer Churn Prediction Using Machine Learning
Python | Pandas | Scikit-learn | Random Forest | Logistic Regression | Streamlit
- Developed an end-to-end machine learning pipeline to predict telecom customer churn using customer demographics, service subscriptions, and billing information.
- Performed data cleaning, exploratory data analysis (EDA), feature engineering, and model evaluation on 7,000+ customer records, identifying key churn drivers including tenure, contract type, and monthly charges.
- Achieved 80.7% classification accuracy and a ROC-AUC score of 0.826 using Logistic Regression and Random Forest models, enabling proactive identification of at-risk customers.

Retail Sales Forecasting Using Machine Learning
Python | Pandas | Scikit-learn | Random Forest | Streamlit | Data Visualization
- Developed an end-to-end machine learning solution to forecast Walmart weekly sales using historical sales records and store-level attributes.
- Performed data cleaning, feature engineering, and exploratory data analysis to identify seasonal trends, holiday effects, and store performance drivers.
- Built a Random Forest regression model achieving an R^2 score of 0.976, demonstrating strong predictive performance for retail sales forecasting.
- Designed an interactive Streamlit dashboard that enables users to predict weekly sales and visualize key business insights through feature importance analysis.

DocBOT – Local Full-Stack Document AI Assistant
React | Node.js | ChromaDB | Ollama (Gemma 7B) | Transformers.js
- Built a privacy-first local RAG application to parse, index, and query PDF documents using React, Node.js, Express, ChromaDB, Ollama, and Gemma 2B.
- Developed an end-to-end pipeline with OCR (Tesseract.js), PDF text extraction, local embeddings (MiniLM via Xenova Transformers), and semantic retrieval for context-aware question answering.
